Anthime ROUX

Freelance Game Developer | Unity, C#, Blender & Technical Art

anthime.roux@hotmail.fr · Montrouge (92) · +33 (0)6 73 64 92 64
anthime-r.github.io/Portfolio

Freelance Unity developer specializing in virtual reality, production tooling and technical art (shaders, 3D pipeline, asset integration). Experience covering the full cycle from concept to deployment for varied clients — art gallery, research lab, startups — working fully autonomously or within small teams.

PROFESSIONAL EXPERIENCE

Galerie Perrotin — Unity Developer *10/2025 – present*
Freelance (Auto-entrepreneur) · International contemporary art gallery
- Standalone macOS application enabling the creation of 3D simulations for exhibitions and art fairs.
- Maintenance of the existing project and development of new features.

LMC2 — Memory, Brain and Cognition Lab *09/2024 – present*
Unity Developer · Internship then freelance · Research lab (VR experiments)
- Virtual house: creation of a therapeutic, inclusive online space, inspired by platforms such as Habbo.
- Gameplay development integrating Playfab, Vivox and netcode for game objects.
- Tool development to streamline deployment onto standalone VR headsets.
- Creation of VR experiences for PhD students and clients (Quest, HTC Vive, etc.).
- Extraction of experimental data into a usable format.

LessonSharing — Unity Trainer *08/2023 & 08/2024*
Freelance (Auto-entrepreneur)
- Teaching for a preparatory class.
- Preparation of teaching materials.

GreenBig — UI Developer *04/2021 – 07/2021*
Freelance (Auto-entrepreneur) · Social and environmental impact startup
- Development and optimization of a Unity-based UI.
- Maintenance and IT upkeep of the machine fleet.

OTHER EXPERIENCE

Tech Kids Academy — Facilitator, Content Writer *2020 – 2021*
Internship / freelance · Pioneering EdTech startup
- Creation of Blender and Unity prototypes, documented for teaching purposes.
- Facilitation of game-dev introduction workshops for groups of children (ages 7–12).

Telligo — Camp Counselor *Summer 2019 – 2026*
Themed summer camp organization
- Ran 13 "Video Game Academy" themed camps (software developer, game designer).
- Introduced young people aged 11–18 to Unity, RPG Maker, Game Maker and Blender.

SCHOOL PROJECTS

Hop Around *2021 – 2022*
Bachelor's project at Rubika · Android platformer
- Game concept design and C# programming of the character controller (acceleration, bump, grapple...).

Rewind *2019 – 2020*
Bachelor's project at LISAA · 2.5D platformer / puzzle, PC
- Project lead for a team of 4; prototyped the core gameplay in C# (time-control mechanic) and produced the 3D assets. Available on itch.io.

TECHNICAL SKILLS

Unity
C# programming, asset integration, HLSL / ShaderGraph basics, tool development.

Blender
3D modeling, UV unwrapping, retopology.

Godot
C# programming.

SOFTWARE

Photoshop / Gimp — photo editing, export

Illustrator / Animate — drawing, vector animation

Premiere / Shotcut — video editing, export

Git / Perforce / PlasticSCM — version control

EDUCATION

2022 – 2024 · RUBIKA
Master's in Game Programming

2021 – 2022 · RUBIKA
Bachelor's in Game Programming — gameplay programming (Unity), graphics programming

2017 – 2020 · LISAA Paris
Bachelor's in Video Game Design 2D/3D — 3D environment, lighting, shaders

VOLUNTEER ACTIVITIES

Numérique pour tous
Digital literacy outreach to support beneficiaries' independence; personalized support.

Change de ton
Amateur choir with around sixty members; participation in rehearsals and performances.

INTERESTS

Sculpture (Raku / clay / Fimo)
Sculpting animals and characters.

Drawing
Traditional observational drawing (museums, everyday life) and digital drawing.

Video Games
Completionist.
